

Electronics Technician

Sensing Strategies, Inc. is a small company that develops novel instrumentation and software applications for challenging remote sensing problems. Our diverse customer base includes defense, security and industrial sponsors, and we fabricate ground-based, airborne and space-based instrumentation. We seek creative and motivated individuals with backgrounds in engineering and the applied sciences able to contribute to end-to-end development of specialized remote sensing systems and scientific analysis applications.

This position will involve providing technician support for the development of novel electronic technologies. The employee will work alongside a staff of experienced engineers in the following capacities: assembly, testing, and inspection of printed circuit boards, bench testing, assembly of wiring harnesses, providing support for parts selection for circuit designs, general laboratory support such as maintaining stock and coordinating equipment maintenance, management and execution of parts ordering, and preparing and maintaining bills of materials. Opportunities to participate in field testing of novel instrumentation will also exist. An associate's degree or higher is required, and salary will be commensurate with experience and the degree to which the employee is able to work independently.

SSI is a certified Small Business located in central New Jersey with easy access to major metropolitan areas and airports and is about an hour from the shore. SSI maintains a benefits package comparable to larger companies, but retains the small company approach to giving employees exposure to a variety of projects and topic areas. Applicants selected will be subject to a government security investigation and must meet eligibility requirements for access to classified information. U.S. Citizenship is required. SSI is an equal opportunity employer M/F/H/V. Salary will be commensurate with experience and ability to succeed in multiple technical roles within the company.
